

**REMARKS**

Applicant respectfully requests reconsideration of the present application in view of the foregoing amendments and in view of the reasons that follow. Claims 1-2, 6-16, 18, and 25 were previously cancelled. Claims 43, 45, 47, 49, and 51 are currently being amended. Applicant submits that support for the amendments can be found throughout the application as originally filed. After amending the claims as set forth above, Claims 3-5, 17, 19-24, and 26-52 are now pending in this application.

Applicant thanks the Examiner for withdrawing the previous rejection under 35 U.S.C. §101.

**I. Interview Summary**

Applicant thanks the Examiner for the courtesy extended during the Examiner Interview which took place with Applicant's representatives on December 2, 2011. During the Interview, the objection to the specification and potential amendments to address the objection were discussed. The amendments incorporate the Examiner's suggested wording. Claims 43, 45, 47, 49, and 51 have been amended to recite in part "A non-transitory computer-readable device." The Examiner indicated that such an amendment would likely overcome the objection to the specification. No agreement as to the allowability of the claims was reached.

**II. Objection to Specification**

One page 2 of the Office Action, the specification was objected to for a lack of antecedent basis of the claimed terminology "non-transitory computer readable medium." Applicant has amended Claims 43, 45, 47, 49, and 51 to recite in part "A non-transitory computer-readable device having instructions stored thereon that, when executed by a computing device." Applicant submits that support for this amendment can be found throughout the application as originally filed. Accordingly, Applicant respectfully requests withdrawal of the objection.

**III. Double Patenting Rejection Based on U.S. Patent No. 7,206,820**

On page 3 of the Office Action, Claims 3-5, 17, 19-24, and 26-52 were rejected for nonstatutory obviousness-type double patenting as being unpatentable over Claims 1-8 of U.S. Patent No. 7,206,820 (hereinafter "the '820 patent"). A terminal disclaimer regarding the '820 patent is being filed along with this response. Accordingly, Applicant respectfully requests withdrawal of the rejection.
